(908) 380 3704

## Profile

Results-driven, meticulous, computer science student seeking an opportunity to apply skills in problem-solving, analytics, creativity & organization in fast-paced technology-related fields.

## Education

**University of Michigan - Bachelor of Science in Engineering (B.S.E.)**

Sept 2016 – May 2020

Computer Science Major

- Relevant coursework includes Web Development, Computer Security, Needs Assessment & Usability Evaluation and Linear Algebra
- Society of Women Engineers member
- American Cancer Society's Relay for Life campus planning committee member

## Work Experience

**Target - Software Engineering Intern**

June 2019 – Aug 2019

Minneapolis, MN

- Produced and debugged reusable, high-visibility components on Target.com utilizing React framework to service about 300 million customers over the course of my internship
- Optimized image download sizes for user-generated content by over 20% to enhance the user experience through reduced loading times
- Designed and coded website components in an Agile environment utilizing a test-driven development approach

**Canaccord Genuity Inc. - Global Capital Market Data Management Intern**

June 2018 – current

New York, NY

- Utilized SQL skills to maintain over 8,000 client subscriptions and over 18,000 client coverages to facilitate the business-side operations

**Self Employed - Computer Science Tutor**

Dec 2018 – current

Ann Arbor, MI

- Communicated new and abstract ideas effectively to facilitate learning and helped students develop confidence in the subject
- Motivated younger students to adopt a strong work ethic early in their academic career

## Skills

### Technical

Languages - C++, C, Python, MySQL, JavaScript, HTML, CSS

Tools - Git, Jira, Microsoft Visual Studio Code, Microsoft Office Suite, Adobe Suite, Bootstrap

### Leadership

Surpassed fundraising goals as a Relay for Life team captain, raising over \$8,000 for the American Cancer Society through organized fundraising and collaboration with other teams

### Projects

Worked independently to develop and host, [www.eliseminto.com](http://www.eliseminto.com), a personal website utilizing Bootstrap and continued to develop the site into a personal art portfolio, resume host, and future blog platform
